PROJECTS

XLN Sales Agent App – XLN Telecom January 2019
Sheffield, South Yorkshire

- Developed an app to help sales agents locate prospective or current clients and view/edit detailed information about those clients.
- Worked as part of a team following the scrum process. Was awarded prize for excellent communication.
- Built with Android (Java), Firebase and Google Maps.

Lyrics Generator – Sheffield Hallam University March 2020
Sheffield, South Yorkshire

- Developed an application to generate a full set lyrics based genre and a prompt from the user, using multiple neural network models.
- Built using Python and Tensorflow.

Restaurant Management System – Personal Project Present
Dronfield, Derbyshire

- Currently developing a web application to manage restaurant bookings and table layout for a local restaurant.
- Built using node.js, Vue.js, HTML, JavaScript, MySQL and Express.js.

Mehmet Meetings App – Sheffield Hallam University February 2019
Sheffield, South Yorkshire

- An Android app developed for one of my lecturers to schedule meetings, manage rooms and to resolve conflicts with user schedules.
- Developed using Android(Java) and Firebase.

Pairs Trading Using ML – Sheffield Hallam University May 2020
Sheffield, South Yorkshire

- Research project which looked at generating profits by trading stocks/commodities/forex using the pairs trading strategy
- Implemented 4 different methods. 3 proposed already in academic papers and a model based on a reinforcement learning.
- The reinforcement learning strategy significantly outperformed the proposed models.
- Built using Python and Tensorflow.

WORK EXPERIENCE

Work Placement – Plusnet July 2016
